The largest source for extraordinary child themes for Thesis & Genesis!

Our child themes are add-on designs that support (and require) either Thesis from DIYThemes or Genesis from StudioPress. If you haven't had any experience with child themes, they work just like your regular WordPress themes.

The one difference is instead of standing alone, they hook into another parent theme which provides the core functionality. Think of WordPress as the engine, Thesis or Genesis as the body and Themedy as the paint job. You get an incredible new design and keep all the power of an industry-leading framework.

Sound complicated? It's not - installing is as simple as installing any regular theme and can be accomplished with a few clicks from your WordPress dashboard.

What makes Themedy unique is our support for two leading WordPress frameworks with every theme we release. There is no other site that matches the amount and quality of themes we provide for both Thesis & Genesis.

Documentation & Forum Support

If you need support, we're just a click away - to help you overcome common issues. We provide a comprehensive manual and a support forum where you can get answers straight from the community and developers.

Modern Design & Core Features

We craft our designs to look great on the surface while running smoothly in the background. All our themes come with a set of core Themedy features to give you all the power you need in building a solid website.

New Themes all the Time!
