WPSubscribers

What's amazing is ... we've barely scratched the surface ...

There's even still MORE that you can do with WPSubscribers ...

Some of these features have been freshly added....

Such as ...

Add a countdown timer to your form. Want to make a special, very time-limited offer? Add a timer and the option will disappear when it gets to zero...

Footer bars to display messages ... you don't have to use them just to get people to subscribe (though they are very powerful for that, as the above stats show!)

Easy Update -- just click a button

NEW! Add a referral system, so your subscribers get points for referring others...

NEW! Exit Popups now can include any kind of html content, like images, video, and more...

NEW! Header bar -- now put messages (that can be easily seen and easily hidden by the user) into a strip at the top of your blog!

WPSubscribers allows you complete and total flexibility and customization!

Change the look (oops...did we mention the built-in custom templates?) ... how often you want an option to show up, when you want it to show up...and so much more...

Look -- I want this to be....

The LAST WordPress Popup Plugin You Will Ever Need
